SUMMARY

The Technical Consultant II position represents the journeyman level of the Technical Consulting Team. Individuals in this position represent the core internal development team and provide the majority of services using Microsoft SQL Server and Microsoft Visual Studio. They must be comfortable working with a wide variety of business and technical users. The Technical Consultant II is expected to mentor junior technical consultants and contribute to improving the development processes and methodologies used within WDS.

ESSENTIAL DUTIES AND RESPONSIBILITIES include the following. Other duties may be assigned.

- Consult with I.T. staff, WDS management, and WDS staff on the analysis, design, implementation, and troubleshooting of information systems.
- Produce efficient error free application software code which runs efficiently and is easily understood by other developers.
- Analyze, design, modify, develop, and implement software applications to solve business problems and opportunities.
- Document software solutions developed and supported.
- Install and/or support designated software applications.
- Participate in work teams.
- Adhere to I.T. procedures and standards.
- Perform other duties as assigned.
- Provide technical support for WDS software applications.
- Include best practice application security standards within software developed and implemented.
- Meet with users to identify requirements and resolve problems.
- Participate in improving software development standards.
- Mentor and train lower level technical consulting staff.
- Participate in developing and implementing I.T. procedures and standards.
- Act as subject matter expert on one or more WDS software applications.
-
